summary

Versatile, results-driven project leader. Strong problem-solving skills and detail oriented with an eye toward perfection. Extensive knowledge of building codes and accessibility standards and applies knowledge of building construction to produce clear, concise documents. Effective team player with a demonstrated ability to meet multiple deadlines and skilled at developing building programs and budgets based on an assessment of client needs.

Handled project design through all phases of services to building completion. Actively participated in client meetings beginning with initial project development. Developed building programs and budget based on assessment of client needs. Developed construction drawings from schematic design to contract documents. Managed drafting support team. Reviewed and coordinated specifications and consultants' work with drawings. Conducted code analysis and review; handled permitting and variance requests. Represented owner at construction meetings. Conducted field visits and reports; generated architect's supplemental instructions, proposal requests and change orders. Reviewed contractors monthly pay applications. Generated punch lists. Ensured all client objectives met - especially time and budget - at end of the project.

Actively engaged with Project Executive strategically targeting, building the team and winning pursuits for new work. Core part of interview team. Negotiates contract fees and scope with Owner on award – and also with design sub-consultant team.

Participated in 'BIM – 1 Way Forward' strategic planning group for standardizing process, content, training, tools and infrastructure for a 600-person plus A/E firm comprised of acquired legacy firms with their own standards; and spread across several offices.
